TS1500 - ALU TEST SYSTEM

The ergonomically designed and proven TS1500-ALU is available in a variety of sizes. With its extensive functions, it is the bestseller among the test systems.

The TS1500-ALU test system is suitable for testing and quality assurance of medium and large wire harnesses in the cable assembly and automotive supply industries. The test system is characterized by an optimal and ergonomic test grid utilization. In the smallest possible space, a max. number of test adapters can be attached.

Features

- Ergonomic work area (Test grid inclination 20°)
- Variable positioning of the test adapters
- Standardized interfaces
- Efficient and safe testing
- Convenient adaptation

Equipment

- Test adapter (customer-specific connector contour)
- Test point cards (max. 8192 TP)
- Measurement technology
- Voltage and pneumatic supply

Measurements

- Short-circuit tests
- Connection tests
- Component testing
