TS1300 / TS1300L TEST SYSTEM

The smallest test systems TS1300 and TS1300L (low design) in the console housing are particularly well suited for the convenient and reliable testing of smaller cable and wire harnesses.

The on-bench solutions can be used flexibly due to their compact size.

They are equipped with frequently used test components and can also be modified according to the customer's wishes.

The ergonomically designed housing allows convenient adaptation, safe testing and reliable logging.

Features

- Ergonomic work area
(Test grid inclination 20°)
- Variable positioning of the test adapters
- Standardized interfaces
- Efficient and safe testing
- Convenient adaptation

Equipment

- Test adapter (customer-specific connector contour)
- Test point cards
- Measurement technology
- Voltage and pneumatic supply

Measurements

- Short-circuit tests
- Connection tests
- Component testing

Technical data

Test grid:	Depth: 600 mm / 600 mm Width: 400 mm (L) Depth: 400 mm / 600 mm (L) Width: 600 mm
Dimensions:	Depth: Test grid + 300 mm Width: Test grid + 200 mm Height: 500 mm (incl. tester)
Accessories:	* Cable tester CT30ix * Test software CS WIN nx® Lighting Test grid cover Printer Barcode scanner Additional accessories on request
